

# 6250A-C

220V - Pressurized Air Pump Feed

☼ Digital Control

Up to 360, 40z servings per hour

(2) 1.8 Qt Cylinder - (2) 8.5 Qt Hopper

★ Ideal for medium capacity outlets to serve ice cream, frozen yogurt, gelato or sorbet. Fully loaded with all standard options.

# **Pressurized Air Pump Feed**

The Spaceman air pump system allows you to choose between six overrun settings, giving you the ability to add even more air to the product, yielding higher profits, and a creamier, fluffier, and lighter product.

### Fast Freeze Down

Patented 100% Controlled Contact Flooded Evaporator – Designed for maximum efficiency, this innovation delivers the industry's fastest freeze-down and recovery times. The result? Smaller ice crystals and the smoothest, creamiest mouthfeel.

## **V5 Single-Piece Auger Design**

A fully integrated auger eliminates parts, reduces cleaning time and failure points in the drivetrain, ensures 100% evaporator wall contact, and enhances product consistency with the smallest ice crystals and smoothest mouthfeel in the industry.

## Smart Safety Controls & Standby Mode

Independently set and control standby temperatures for the hopper and freezing cylinder, optimizing energy efficiency and product quality during non-use. Maintains product temperature in both mix hopper and freezing cylinder below 4.4°C (40°F) overnight.

### **Hopper Agitator**

Maintain product consistency and prevent product separation

### **Defrost for Cleaning**

Increases efficiency during cleaning by heating frozen product in cylinder

## **Inverter Motor Control for Enhanced Durability**

Allows the use of three-phase motors with single-phase power input, reducing torque and strain by controlling start-up speed. This innovation significantly minimizes gearbox and drivetrain failures caused by operational errors or freeze-ups.

## **Separate Hopper Cooling Controls**

Independently control and cool each hopper to maintain ideal temperatures, prevent freezing around the sides, and optimize output by pre-chilling the product before it enters the freezing cylinder.

## **Advanced Air Pump Design**

Engineered for compatibility with a wider range of products, our oversized air pump features a control system that keeps the freezing cylinder full, preventing product starvation. With fewer parts, it is easier to use, clean, and maintain for seamless operation.

# **The Spaceman Difference**

### **QUALITY**

## **Superior Craftsmanship**

# **Designed by Aerospace Engineers**

- ✓ Patented Freezing Cylinder
- ✓ Built to last, attention to detail
- Microcrystal Technology

## **VALUE**

## **Maximum ROI**

### **Lower Your Cost of Ownership**

- ✓ Fair up front cost
- ✓ Lower service and parts costs
- ✓ Lowest energy cost per serving

### **SERVICE**

# **Best User Experience**

## **Service on Your Terms**

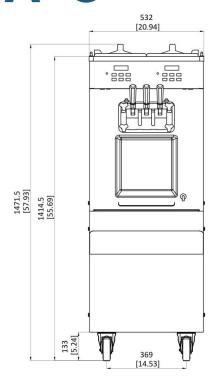

- ✓ Dedicated Success Team
- No binding contracts
- No locked-in maintenance fees
